Standard Fit Retention

Specifications for the BA3A-TC BALLISTIC HELMET with Standard Fit Retention System

SHELL

The shell is manufactured utilizing advanced Thermoplastic Aramid and Glass Fabric Composites, raising the level of protection while reducing the weight to two pounds, for the utmost in protection and comfort. Shell trim contour does not have a brim but has an extra wide eye port opening for maximum peripheral vision to comfortably accommodate all known gas masks and goggles. Neck trim line provides maximum protection while allowing uninhibited movement when wearing most ballistic vests with collars. Entire helmet is finished off with extruded neoprene rubber trim and protected with scratch resistant flat paint.

SIZES

Size Range 6 3/4" to 7 7/8". A comfortable, four point, fully adjustable sizing system accommodates XS-XL, and is combined with a maximum perspiration absorbing liner.

RETENTION SYSTEM

The **Standard Fit** retention system is built of tubular poly webbing reinforced with double bar tacked stitching in critical areas, and will come with both a fully adjustable, smooth slide lock system, and padded nape strap to insure a stable, secure fit. A user friendly quick release mounted on the left side of the wearers head will facilitate easy on, easy off use with no interference when sighting the individual's weapon for target acquisition. The entire retention system shall be attached to the ballistic shell with a sturdy four-point flush bolt system, and will include a soft comfortable chin cup.

STANDARDS

Helmet has been tested to the NIJ 0106.01 Ballistic for penetration.

OPTIONAL ACCESSORIES
