

GUNFIGHTER

Specifications for the GUNFIGHTER Helmet with MCIP 7 Pad System

SHELL

The Shell is manufactured utilizing advanced Thermoplastic Aramid and Glass Fabric Composites, which provide a high level of ballistic protection at a weight less than the specification of the U.S. Military ACH helmet. It is built with similar dimensions to the U.S. Military ACH helmet allowing for better unobstructed view and increased hearing capability than the PASGT helmet. The neck trim line provides maximum protection while allowing uninhibited movement when wearing most ballistic vests with collars. The entire helmet is finished off with extruded neoprene rubber trim and protected with scratch resistant non reflective flat paint. Weight is 2.3 to 2.7 pounds.

SIZES

Sizes range from Small through X- Large. Four helmet shell sizes and variable thickness impact absorbing pads (Standard Size 6 at 3/4" or Optional Size 8 at 1") for personal helmet comfort adjustment.

RETENTION SYSTEM

The retention system is built of tubular poly webbing reinforced with double bar tacked stitching in critical areas, and will come with both a full adjustable, smooth slice lock system, and padded nape strap to insure a stable, secure fit. A user friendly quick release mounted on the left side of the wearers head facilitates easy on, easy off use with no interference when sighting the individual's weapon for target acquisition. The entire retention system shall be attached to the ballistic shell with a sturdy four Point flush bolt system, and will include a soft durable split leather chin strap.

MAXIMUM COMFORT IMPACT PROTECTION 7 PAD SYSTEM

The pad system consists of seven ergonomically designed individual pads constructed of multi density shock attenuating polymer foam encased in a thermally sealed moisture proof inner liner. The outer portion of each pad is covered with a soft poly propylene material that wicks moisture from the wearers head to help moderate extreme temperatures. All seven pads are removable and can be adjusted to various positions for better individual comfort and fit.

STANDARDS

The helmet has been tested at certified labs and meets or exceeds the NIJ Level IIIA Ballistic standard for penetration, and meets a minimum of 650 mps V-50 for 17 grain (1.1 gram) tested according to STANAG 2920.

ACCESSORY OPTIONS

- NVG Hole and Shroud
- Side Rails
- Velcro Appliqué
- Colors: Black, OD Green and Coyote Tan
- Size 8 (1") Retention Pads
